 - UV-LED Printable
 - Indoor Use
 - Outdoor Weatherable
 - UV Stable
 - UL approval for components products - yellowcard E354751

Mirror

One advantage of mirror acrylic is that it does not break as quickly as normal mirrors. In fact, it is technically unbreakable. Another advantage over normal mirrors is that it is a lot lighter in weight and is easy to fabricate. This mirror acrylic is 25 times stronger than glass and is in stock in 10 different colors. Mirror acrylic is lightweight, rigid, practically unbreakable and barely knows any thickness tolerance.

Pearl

The Pearl color collection consists of 4 pastel colors with a Mother of Pearl effect. This collection is made from 100% recycled acrylic. With its beautiful glow and optical structural color, Mother of Pearl is the perfect material to give your creations an elegant vintage look. The material is made of opaque acrylic (Plexiglas®) which is not see-through and which also does not transmit light. Mother of Pearl shades are currently very trendy in the fashion and design world.

Glitter

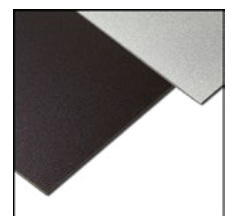

Like Rowmark's Pearl collection, the Glitter Metallic products cannot be seen through and do not transmit light. Because all of the Glitter products have two different colors (front and back), there are a total of 10 different colors available for this eye-catching product line.
